PROFESSIONAL SUMMARY

Backend-focused Software Engineer with **1.6+ years of experience** designing and developing scalable RESTful APIs and backend systems using **Python and FastAPI**. Strong background in database design, API performance optimization, authentication, and CI/CD pipelines. Experienced in collaborating with frontend teams while owning backend architecture, data integrity, and application scalability.

EXPERIENCE

Backend Developer (Full Stack Role)

Jun 2024 – Present

Trangla Innovations Pvt. Ltd

- Designed and developed scalable RESTful APIs using **Python FastAPI**, supporting core business workflows and reducing API response time by **30%**.
- Implemented JWT-based authentication and role-based access control (RBAC), improving application security and access management by **40%**.
- Designed and optimized PostgreSQL and MySQL database schemas, improving query performance and data consistency by **35%**.
- Built backend services for CRUD operations, reporting, and analytics, supporting **500+ active users**.
- Integrated backend services with frontend applications, ensuring seamless data exchange and reducing production issues by **25%**.
- Containerized backend services using Docker and automated deployments via GitHub Actions, reducing release cycles by **40%**.

PROJECTS

EduManage – Backend for Student Portal & LMS | *FastAPI, PostgreSQL, Docker*

- Designed and developed backend APIs for authentication, course management, grading, and reporting, serving **500+ users**.
- Implemented role-based access control and secure API endpoints, reducing unauthorized access incidents by **45%**.
- Optimized database queries and API logic, improving backend performance and response times by **30%**.
- Implemented structured error handling, logging, and input validation, improving API reliability and reducing production issues by **25%**.

QuickService – Backend Task Management System | *FastAPI, MySQL, JWT*

- Developed backend services for task assignment, tracking, and customer management, improving business process efficiency by **40%**.
- Implemented JWT authentication and API validation, ensuring secure and reliable backend operations.
- Exposed REST APIs consumed by frontend teams, enabling real-time task updates and reporting.
- Designed modular service layers and reusable API components, improving backend maintainability and scalability by **30%**.

InventoryFlow – Inventory Backend System | *FastAPI, PostgreSQL, Docker*

- Built backend services to manage inventory CRUD operations, validations, and reporting dashboards.
- Improved inventory tracking accuracy by **30%** through backend-level validations and optimized queries.
- Deployed containerized backend services using Docker, ensuring environment consistency and scalability.
- Implemented database indexing and pagination strategies, reducing API load time and improving performance by **35%**.

TECHNICAL SKILLS

Backend: Python, FastAPI, REST APIs, JWT Authentication, RBAC

Databases: PostgreSQL, MySQL, ORM (Prisma/SQLAlchemy)

DevOps: Docker, GitHub Actions, CI/CD, Linux Basics

Frontend (Working Knowledge): React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Tools: Git, GitHub, Postman

EDUCATION

Kallam Haranadhareddy Institute of Technology, Guntur

2020 – 2024

B.Tech in Electrical and Electronics Engineering
